What I can do

I am a senior cloud infrastructure architect with an advanced experience of Ansible and Linux. I have a good knowledge of asciidoc and YAML and some other languages. I can understand or design complex infrastructure and like to trace issues. I'm also curious and willing to learn by myself.

TECHNOLOGIES

Asciidoc, graphviz, LaTeX, docbook, plantuml.

Ansible, YAML, Puppet, Bash, Hashicorp, goss

AWS, Azure, Openstack, Docker, Kubernetes, Libvirt/KVM, Vmware

Debian, Ubuntu, CentOS, PFSense, MacOS X, Windows.

Apache, Nginx, Varnish, Nodejs, Php, Python

MySQL, PostgreSQL, MongoDB, Redis, Elasticsearch

Backupninja, Rdiff-backup, Btrfs snd/rcv

PFSense, OpenVPN, IPSec VPN

Arachni, Netsparker

EXPERIENCE

Cloud Infrastructure Architect (Stylelabs, Cloud software editor, Brussels, Belgium) 2017-2019

- Lead development of automation tools (Ansible TDD, goss),
- Mentoring and empowering colleagues,
- R&D to onboard new technologies (molecule, golang, Kubernetes, AWX).

Senior Devops (Emakina, Digital agency, Brussels, Belgium) 2015-2017

- Infrastructure as code (Ansible, Puppet),
- Security assessments (Arachni, Netsparker),
- Build & deployments automation (Jenkins pipeline, Artifactory),
- Setup & maintenance of Linux servers & related services (Debian).

Linux System Administrator (Antidot, Web software editor, Brussels, Belgium) 2012-2015

- Systems and network administration (Debian, Centos, Pfsense),
- Technical project management (infrastructure revamp/migration, Scrum meets Prince2),
- Infrastructure as code (Rudder, then Ansible),
- Devops instrumentation: git, continuous integration, monitoring.

Technical writer for Rudder project (Normation, Paris, remote) 2011

- User documentation tooling (single source, multiple outputs automation).
- User documentation writing (asciidoc, hand crafted graphviz),
- QA : user experience improvements, bug reporting, usability tests.

Opensource consultant (Inuits, Antwerp, IT services, Belgium) 2010-2011

- Missions for: OFO-IFA, Centre Hospitalier Jean Titeca.
- Technical projects management, analysis, implementation,
- Evangelization at technical conferences in Paris, Antwerpen, Leeds.

Linux System Administrator (Mediaxim, Medias monitoring, Brussels, Belgium) 2010

- Conceiving an IT strategy and translating it into an operational plan,
- Maintaining live the production (400 Linux servers, 100 desktops),
- Promoting and leading improvement initiatives.

System Administrator (Emakina, Brussels, Belgium) 2008-2009

- ITIL Incidents and users requests management, Level 1-2-3,
- System administration (150+ MacOSX & Windows, 50 Linux servers),
- Automated desktop deployment and maintenance (GLPI, WPKG).

System Administrator (FIJ Saint-Gilles, Training Center, Brussels, Belgium) 2007

- Participating and presenting projects in weekly team meetings,
- Implementing automated deployment (100 Windows + Linux PCs).

System Administrator (Instituts Saint-Luc, Art school, Brussels, Belgium) 2006-2007

- Maintaining desktops without network (200 MacOS X, Windows),
- Auditing the infrastructure and proposing evolution.

Opensource contributions

Contributed to ansible, modoboa, arachni, wpscan: <https://github.com/themr0c>

Contributed to Rudder documentation, 2012: https://issues.rudder.io/activity?from=2012-01-24&user_id=13

Organisation of monthly talks about free software, 2009-2012: <http://jeudisdulibre.be/>

Participation in weekly radio show about free software, 2012-2013: <http://www.radiopanik.org/recherche/?q=good+morning+stallman>

Various talks about open source solutions: [Slideshare page](#)

EDUCATION & CERTIFICATIONS

2014 - PRINCE2 Foundation

2008 - LPIC-1 Linux certified professional

1999 - MA in History ("DEA"), University Lumière Lyon 2, France

1997 - BA in French Literature ("Licence"), University Lumière Lyon 2, France

Languages

French: native

English: fluent

German: fluent

Dutch: notions

Interests

My almost 2 year old girl!

Cooking, eating,

Kayaking, Hiking, Biking,

Books, Theater, Movies.

Recommendations

I had the chance to work with Fabrice on several critical and complex projects. From new infrastructure design & implementation projects to operations' day to day management: I was delighted by his long term vision, attention to details, ability to anticipate and avoid problems, on top of his very broad knowledge of Linux systems, configuration management and application servers.

— Sebastien Le Grand, CEO at Antidot s.a.

Fabrice is a very nice human person, he is funny, always positive and really a pleasure to work with. He is a knowledgeable expert in Unix, Linux, MacOS X and Network administration and has an attention to details. He enjoys tweaking OpenSource software and solving problems by himself, thanks to the community. By duty, he knows also a bit about Microsoft Windows administration. He is always looking to being useful, always ready to help, and think proactively, anticipating the problems before they happen.

— Brice Le Blévennec, CEO at Emakina Group

Fabrice is a solution driven person, always looking for the best solution for the end-user. Moreover he constantly tries to improve the way of working. Unix/Linux lover & expert, he can jump into Windows environment like a fish in water :-)

— Sophie Vandebussche, Developer and Project manager

Fabrice always finds a solution to your problem, at any time. He's willing to help and go one step further. You can count on him during stress.

— Anne Bourguignon, Creativity Department Director

Fabrice is a competent and enthusiast system administrator. Always looking to find smarter and cleaner solutions to IT challenges or problems, his positive spirit, coupled to a strong open-source culture, is definitely an asset in the ever-changing world of software development. His kindness and his ability to explain infrastructure issues to non-experts makes him even more valuable.

— Pierre Vanliefland, Full-stack developer and analyst

Fabrice always works in a very professional way, trying to do things right the first time around rather than following the "quick and dirty" road, which to me is a very good thing. Fabrice is also very friendly and a nice person to be around.

— Yannick Lemin, Android developer fanatic - GDG Organiser - Podcaster

Fabrice is a cheerfull colleague to work with and allways was very helpfull on the professional level. He is an openminded person, passionate by different aspects of IT support, mostly by all the open source side of internet.

— Régine Lagasse de Locht, Receptionist - Office management at Emakina

Fabrice is a good and hard worker, a real nice person with whom you can share a laugh. He also thinks out of the box and sees problems as challenges. He likes to plan things and is not short sighted but thinks about his solutions to issues now, but also in the future.

— Kim Ausloos, DevOps at Cegeka

Very good knowledge of Linux systems, good job while compiling smb packages and wpkg, GLPI configuration

— Michaël Froidebise, System administrator at PwC Luxembourg
